TECHNICAL SKILLS

Programming Languages : JavaScript , Python , MATRIX LABORATORY

Web Technologies : HTML , CSS

Framework/Runtime env/library : React, Node.js

Version Control : Git, GitHub

Developer Tools : VS Code

Software/Tools : MS-excel , MATLAB Simulink

PROJECTS

PERSONAL PROJECTS

Employee Management System

- An Employee Management System (EMS) using React and Local Storage is a simple yet effective way to manage employee data in a front-end application. In this system, React is used for building the user interface (UI), while Local Storage is used to store data persistently in the browser, even after the page is reloaded. This system could handle tasks like adding, updating, and deleting employee records.

Recipe Viewer

- A recipe website enabling users to search for recipes, upload their own recipes to local storage, and access detailed cooking directions.

MAP

- A workout web app that allows users to click on a map location, set a distance, and choose between cycling or walking. It then marks and visualizes the route.

INTERNSHIPS PROJECTS

Front-end web development

- **Tiffin service UI :** The Tiffin Service UI project is designed to create a simple, user-friendly interface for customers to order home-cooked meals online.
- **E-commerce UI:** An E-commerce UI is a website interface designed to showcase products, allow users to interact with them add to cart, view detail.

Python

- Expense Tracker

EDUCATION
